

### **CaseStack 2008 Delivered Green Award Winners**

Carolina Soy Products: A subsidiary of Whole Harvest products, the company produces consumer culinary oils and pan sprays without any Trans Fatty Acids. These natural and cholesterol-free products also contain Vitamin E and Omega 3's. Carolina Soy Products uses 100 percent expeller-pressed and naturally refined soybean oil.

Catalytic Solutions: Based in Ventura, Calif., Catalytic Solutions produces and distributes emission control systems, focusing on the Heavy Duty, Energy Systems and Light Duty Vehicle markets. Using patented technology, the company's products improve air quality, sustainability and energy efficiency.

Falcon Trading Company: Also called SunRidge Farms, Falcon Trading began in 1977 in Santa Cruz, Calif., and provides bulk and packaged organic and natural snack mixes, dried fruits, grains, granolas and nuts and seeds to more than 5,500 retailers across the U.S. Their natural products do not use unrefined sugar, hydrogenated oils, artificial coloring or preservatives.

IVESCO LLC: Founded in 1945 in Iowa Falls, Iowa, IVESCO's 23 locations distribute animal health products nationwide. With more than 30,000 products including equipment, insecticides, nutritionals, pharmaceuticals and vaccines, their products are used in the dairy/beef, cow/calf and poultry and swine industries and are sold in dealer retail stores, veterinary clinics and livestock operations.

King Luminaire Company: A division of the StressCrete Group, King Luminaire produces high-quality, high-performance lighting fixtures. In addition to their decorative lighting, King Luminaire also manufactures supporting materials including poles, bollards and capitals. The company also produces a Post Top LED line without any hazardous materials with five times the life of a normal fixture.

Vournas Coffee Trading: The specialty green coffee provided by Vournas is distributed to small-to medium-sized wholesalers and retail coffee roasters across the United States. The company, which began operating in 2002, carries 70 coffees from all over the world including Organic, Fair Trade, shade grown and decaf lines.

#### **Q: What is the CaseStack Delivered Green Program?**

A: The Delivered Green Program recognizes carriers and customers focused on sustainable logistics. Fuel efficient fleets run better, last longer, lower emissions and save money. CaseStack's goal as a sustainability-focused supply chain innovator is to provide these forward-thinking solutions to customers across the spectrum. The Green Carriers list includes companies that employ sustainable practices, including idling practices, SmartWay and Environmental Protection Agency certifications, and body, engine and tire modifications. CaseStack customers who ship their products on Green Carriers more than 40 percent of the year qualify as Delivered Green award winners.
