Transportation Solutions Division

We deliver.

No matter the mode or the deadline, our solutions help your business thrive.

CaseStack provides complete, global transportation management solutions and has strategic relationships with providers of all transportation modes, including ocean, air, less-than-truckload (LTL), truckload (TL), parcel and rail. Our real-time online technology allows you to track shipments, obtain rate quotes, check the status of claims, request proof of delivery, and obtain routing information.

Clients benefit from reduced transportation costs, improved transit time, increased on-time delivery, and reduced damages. Our team will become your logistics infrastructure, offering additional services of carrier selection/performance monitoring, rate negotiation, claims processing and freight bill auditing/payment.

We take the time to get to know your unique needs and the best way to meet them. Then we make carriers compete for your business, resulting in competitive rates and options to help save you even more. Each step of the way, your account representative will track the order, verify delivery and help you navigate through the logistics paperwork. Our customer service team will handle all your claims, rescheduling, metrics reporting and billing invoices. They will become an extension of your logistics team and learn the special handling requirements of your products. We are dedicated to exceeding your expectations so you can concentrate on making your business a continued success.

24/7 Access to your business.

Whether it's from dock to destination or rail to retailer, our commitment to deliver innovative solutions means insight to the movement of your product. Complete visibility of your transportation activity via our Web-based system provides unprecedented access to centralized, real-time logistics information such as shipment tracking, rate quotes, claims processing and proof of delivery. The system is available 24/7 and made accessible through any standard web browser, anywhere in the world.

Through our Web-based interface, you can:

- Obtain instant rate quotes
- Select carriers & monitor performance
- Process claims
- Manage freight invoice
- Request proof of delivery
- Track shipments
