## 2006 CRYSTAL ACHIEVEMENT AWARDS

## CASESTACK

A provider of logistics functions, CaseStack integrates with a company's infrastructure to act as its logistics department. The company provides truckload, less-than-truckload, parcel, ocean, air, and rail services combined with total warehouse management visibility. In addition, it can handle, ship and store large, fragile products, making it appropriate for window and door manufacturers, it states. The system is user-friendly, allowing a customer to monitor its shipments and check inventory in real-time, 24/7. Clients enter retailer orders into the CaseStack Web site. CaseStack then manages the entire process of transferring the product from one of its strategically located warehouses to its final destination, delivering on time, damage-free and securing the lowest shipping rates along the way, the company reports.

## TURNSTYLE

Turnstyle Designs has launched a line of color leather hardware and will attempt to stitch or glue any shape or style hardware, from door pulls to

fiddle rails, the company states. Its stock collection includes more than 20 styles of door handles, door pulls, push plates, and window fittings. The manufacturer heavily considers the type of full grain, bridal leather as well as correct tanning process before producing a new piece of hardware. The new range of colors available includes Library Green, Atlantic Blue and Jazz Red. + 44 (0) 1271/325325 | [www.turnstyledesigns.com](http://www.turnstyledesigns.com)

## RAILING DYNAMICS

Novaline is the industry's first paintable and stainable engineered wood railing system, the manufacturer reports. Made of 75 percent oriented long-strand wood fiber encapsulated in polypropylene, the product is Railing Dynamics' first wood-based railing line. It is available in a Pearl white co-extruded cap-stocked system;

two variegated wood tones, and in unfinished engineered wood which can be easily painted or stained. For an added, custom touch, customers can add copper and stainless

NOVALINE

steel accents to any of the systems, as well as additional accessories such as Kindle solar lighting. 877/420-7245 | [www.rdirail.com](http://www.rdirail.com)

## ALUM-A-POLE

Pro-Trim bendable vinyl coil from Alum-A-Pole Corp. has been lab tested and approved for use with both CCA and ACQ treated lumber, according to the manufacturer. It is available in two options, including on 50-foot by 24-inch rolls, plain or grain, with many color options and bendable on any brake. This version's design lends itself to capping wood, with shape bending capability far exceeding aluminum. The other version comes pre-creased in several dimensions, with custom creasing available on large volume orders. This version can be hand bent, typically used for flashing. 800/421-2586 | [www.alumapole.com](http://www.alumapole.com)
